### PROGRAM HIGHLIGHTS . . .

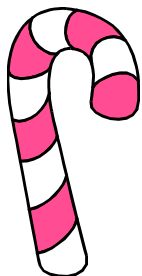

December 6 - Dr. John Abramson of the Pediatrics Department of Brenner's Children's Hospital was today's speaker. He spoke on Bioterrorism -- specifically Smallpox. Smallpox and its potential threat to society is very much in the news today, and with good reason. It is a virus that is transmitted from person to person, and can make you very ill. Upon first glance, it looks a lot like chickenpox. The current vaccine for smallpox is controversial and does include side effects. Dr. Abramson feels that everyone should be vaccinated, not a voluntary vaccine. This is a very scary subject, but one that we most definitely needed to hear at this time in the world.
